Version History

Revision History

Revision	Date	Author(s)	Description
1.1	22.01.26	SB	Added Google Drive folder selection, Shared Drives (Team Drives) support.
1.0	21.01.26	SB	Initial user guide - SharePoint and Google Drive configuration, synchronization, maintenance.

1 Introduction

1.1 Overview

The **Documents Cloud Storage** module allows you to connect your Odoo Documents workspace to your cloud storage services:

- **Microsoft SharePoint Online**: For organizations using Microsoft 365
- **Google Drive**: For organizations using Google Workspace

1.2 Key Features

Feature	Description
Bidirectional sync	Files added in Odoo are sent to the cloud, and vice versa
Direct opening	Open Word, Excel, PowerPoint files directly in Office Online
Structure preserved	Folders and subfolders are replicated in the cloud
Sync queue	Transfers are managed in the background without blocking your work

1.3 Prerequisites

Attention !

This module requires the **Documents** module from Odoo Enterprise. It is not compatible with the Community version.

- Odoo 19 Enterprise with the Documents module installed
- For SharePoint: A Microsoft 365 Business account with SharePoint Online
- For Google Drive: A Google Workspace account
- Odoo administrator rights for initial configuration

2 SharePoint Configuration

2.1 Step 1: Create the Azure Application

Before configuring Odoo, you must create an application in Azure Active Directory.

Note

This step requires a Microsoft 365 administrator account. Contact your IT department if you do not have the necessary permissions.

2.1.1 Access the Azure Portal

1. Open `https://portal.azure.com`
2. Sign in with your Microsoft 365 administrator account
3. Search for "App registrations"
4. Click "New registration"

2.1.2 Application Settings

Field	Value
Name	Odoo Documents Connector (or a name of your choice)
Supported account types	Accounts in this organizational directory only
Redirect URI	Leave empty (not required for Client Credentials)

2.1.3 Retrieve the Credentials

After creation, note the following information from the application's main page:

- **Application (client) ID**
- **Directory (tenant) ID**

2.1.4 Create a Client Secret

1. In the left menu, click "Certificates & secrets"
2. Click "New client secret"
3. Description: "Odoo Connector"
4. Expiration: Choose according to your policy (24 months recommended)
5. Click "Add"

Attention !

Copy the secret **Value** immediately. It will not be visible after you leave this page.

2.1.5 Configure API Permissions

1. In the left menu, click "API permissions"
2. Click "Add a permission"
3. Select "Microsoft Graph"
4. Choose "Application permissions" (not "Delegated")
5. Add the following permissions:
   - `Sites.ReadWrite.All`
   - `Files.ReadWrite.All`
6. Click "Grant admin consent"

2.2 Step 2: Configure the SharePoint Backend in Odoo

2.2.1 Access the Configuration

1. In Odoo, go to the **Documents** application
2. Menu **Configuration** → **Cloud Storage** → **Backends** → **SharePoint**
3. Click **New**

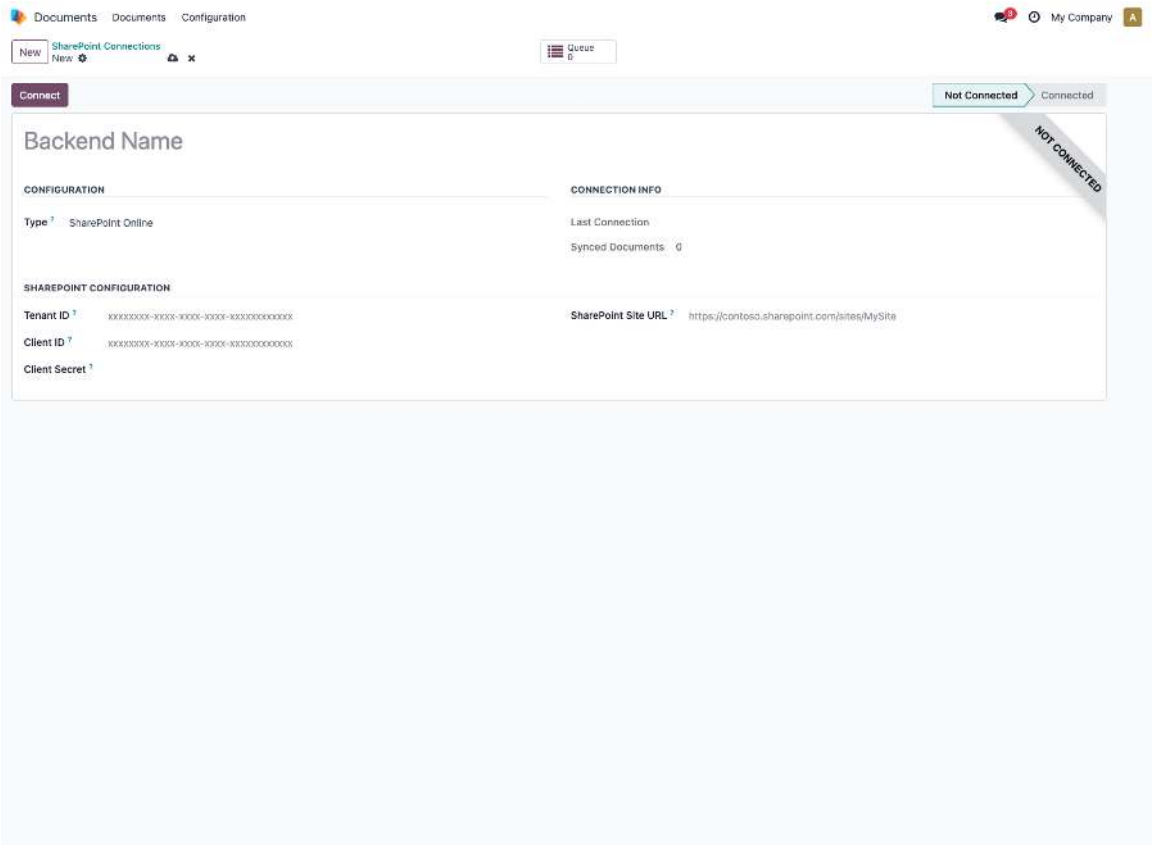

Figure 1: Odoo - Accessing SharePoint Backends

2.2.2 Fill in the Form

Field	Value
Name	SharePoint Production (or an explicit name)
Type	SharePoint Online
Tenant ID	The Directory ID copied from Azure
Client ID	The Application ID copied from Azure
Client Secret	The secret value copied from Azure
SharePoint Site URL	Your SharePoint site URL (e.g., https://mycompany.sharepoint.com/sites/Documents)

2.2.3 Test the Connection

1. Click the **Connect** button
2. If everything is correct, the status changes to **connected**
3. The Site ID and Drive ID fields are filled automatically

Astuce

If the connection fails, verify that admin consent has been granted in Azure.

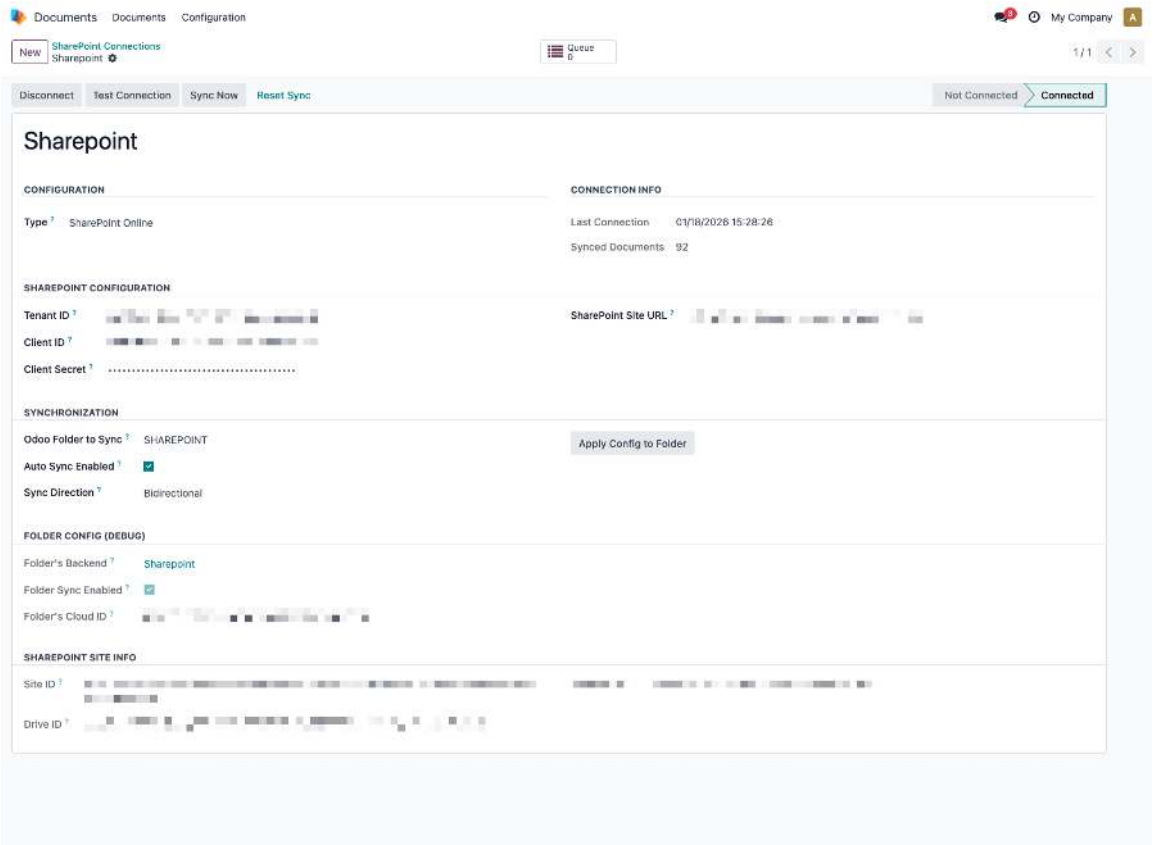

Figure 2: Odoo - SharePoint Backend Connected

2.3 Step 3: Configure Folder Synchronization

Once connected, the **Synchronization** section appears in the backend form.

2.3.1 Configure the Folder to Sync

1. In the **Odoo Folder to Sync** field, select the Odoo folder to synchronize
2. Check **Auto Sync Enabled** to enable automatic synchronization
3. Choose the direction in **Sync Direction**:
   - **Bidirectional**: Synchronization in both directions
   - **Cloud to Odoo**: Import only from SharePoint
   - **Odoo to Cloud**: Export only to SharePoint
4. Click the **Apply Config to Folder** button to apply the configuration to the folder

Attention !

The **Apply Config to Folder** button is mandatory for the configuration to be applied to the Odoo folder.

2.3.2 Launch the First Synchronization

1. Click the **Sync Now** button
2. A notification indicates that synchronization is in progress
3. SharePoint files appear in the Odoo folder

Note

The first synchronization may take several minutes depending on the number of files.

3 Google Drive Configuration

3.1 Step 1: Create the Google Cloud Project

Note

This step requires a Google Workspace administrator account. Contact your IT department if you do not have the necessary permissions.

3.1.1 Access the Google Cloud Console

1. Open `https://console.cloud.google.com`
2. Sign in with your Google Workspace account
3. Create a new project or select an existing one

3.1.2 Enable the Google Drive API

1. In the left menu, go to "APIs & Services" → "Library"
2. Search for "Google Drive API"
3. Click "Enable"

3.1.3 Configure the OAuth Consent Screen

1. Go to "APIs & Services" → "OAuth consent screen"
2. User type: Internal (for Google Workspace)
3. Fill in the required information:
   - Application name: Odoo Documents
   - Support email: Your email
   - Authorized domains: Your Odoo domain

3.1.4 Create OAuth Credentials

1. Go to "APIs & Services" → "Credentials"
2. Click "Create Credentials" → "OAuth client ID"
3. Application type: Web application
4. Name: Odoo Connector
5. Authorized redirect URI: `https://your-odoo.com/google_drive/callback`
6. Note the **Client ID** and **Client Secret**

3.2 Step 2: Configure the Google Drive Backend in Odoo

3.2.1 Create the Backend

1. In Odoo, go to the **Documents** application
2. Menu **Configuration** → **Cloud Storage** → **Backends** → **Google Drive**
3. Click **New**
4. Fill in the fields:

Field	Value
Name	Google Drive Production
Type	Google Drive
Client ID	The client ID copied from Google Cloud
Client Secret	The secret copied from Google Cloud

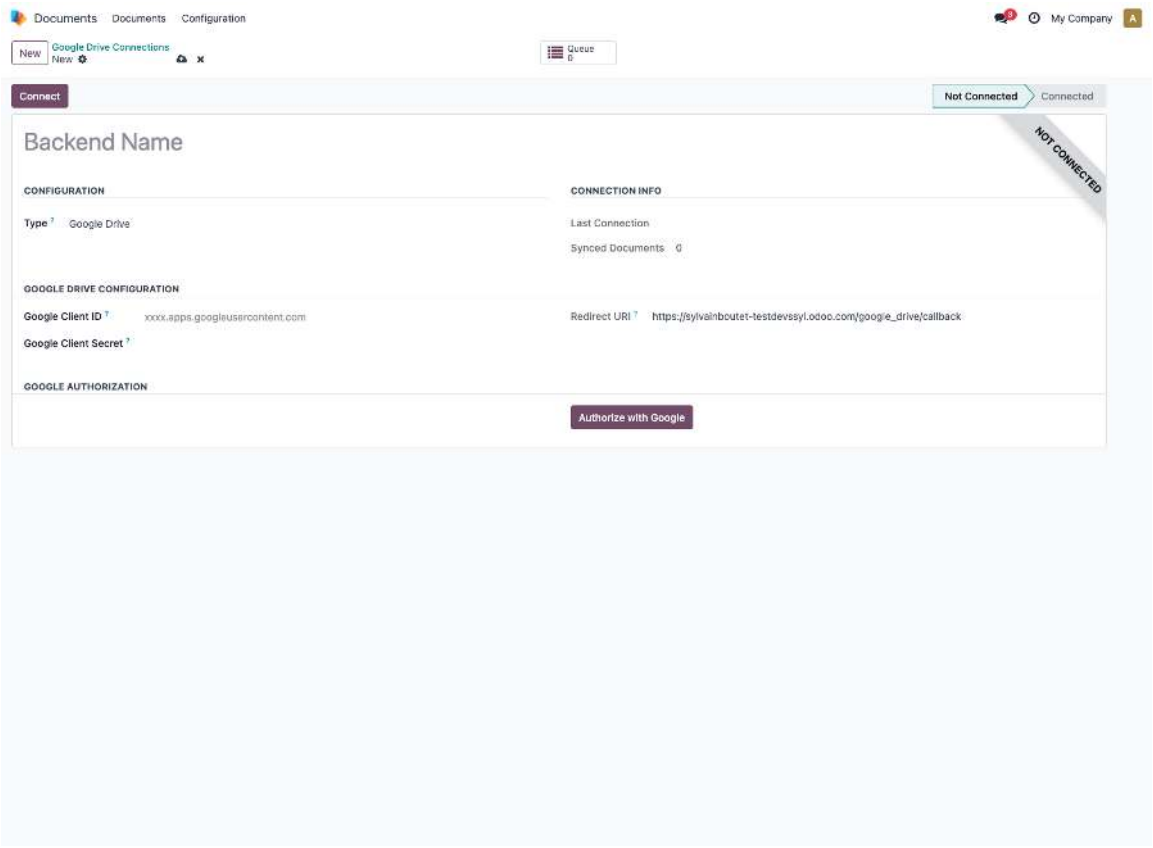

Figure 3: Odoo - Google Drive Backend Configuration

3.2.2 Authorize Access

1. Click the **Connect** button
2. A Google window opens
3. Sign in with the Google account that has access to Drive
4. Accept the requested permissions

5. You are redirected to Odoo with status **connected**

3.3 Step 3: Select the Google Drive Folder

Once connected, you can choose which Google Drive folder to synchronize.

3.3.1 Select a Specific Folder

1. In the **Synchronization** section, click the **Select Folder** button
2. A navigation window opens with the list of folders
3. Navigate through the tree by clicking **Open** to enter a folder
4. Use **.. (Parent)** to go up one level
5. Click **Select** to choose a folder
6. Confirm with **Use Selected Folder**

Note

If no folder is selected, synchronization will use the root of "My Drive".

3.3.2 Using Shared Drives (Team Drives)

To access your organization's Shared Drives:

1. In the **Authentication** section, check **Use Shared Drives**
2. Click **Select Folder**
3. Shared Drives appear with a **link** prefix to distinguish them from personal folders
4. Select the desired Shared Drive then navigate through its subfolders

Astuce

Shared Drives are shared spaces at the organization level. Their content belongs to the team, not to an individual user.

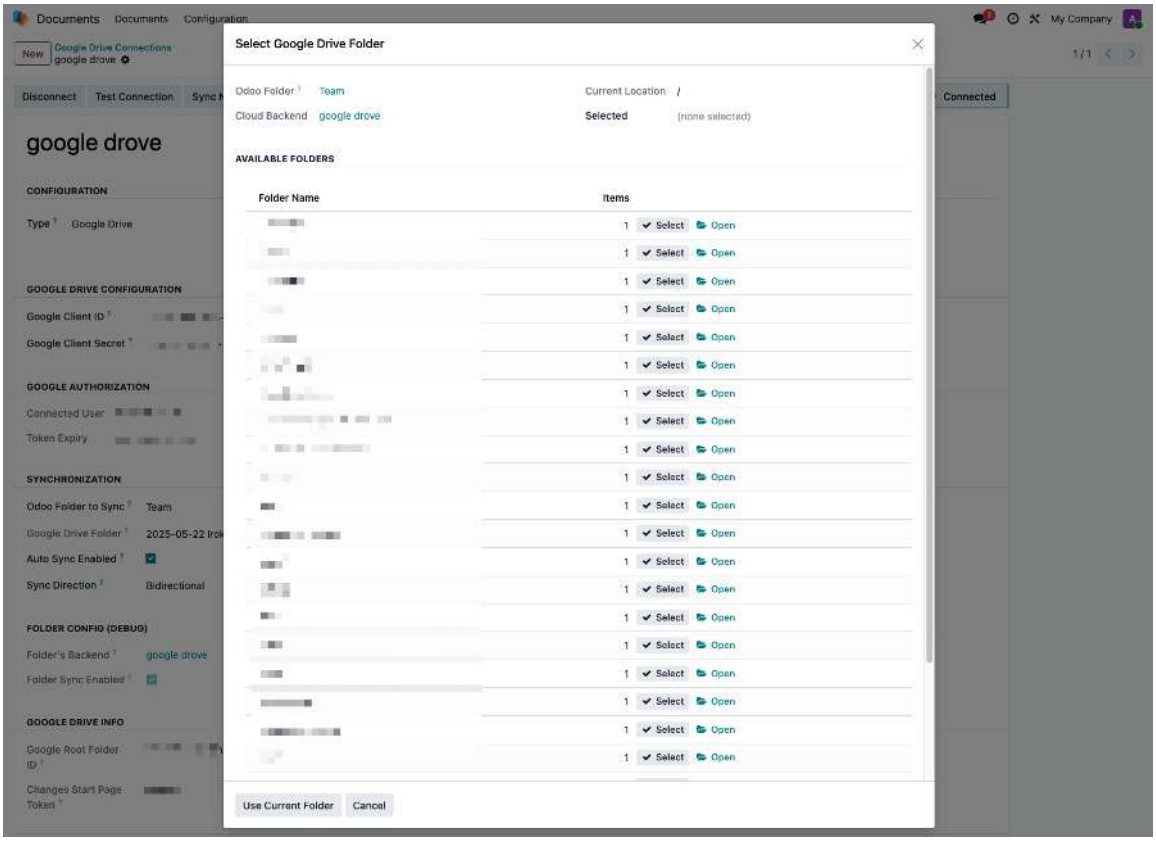

Figure 4: Odoo - Google Drive Folder Selection with Shared Drives

4 Daily Usage

4.1 View Cloud Documents

Documents synchronized from the cloud are visible in the Documents application with a cloud icon.

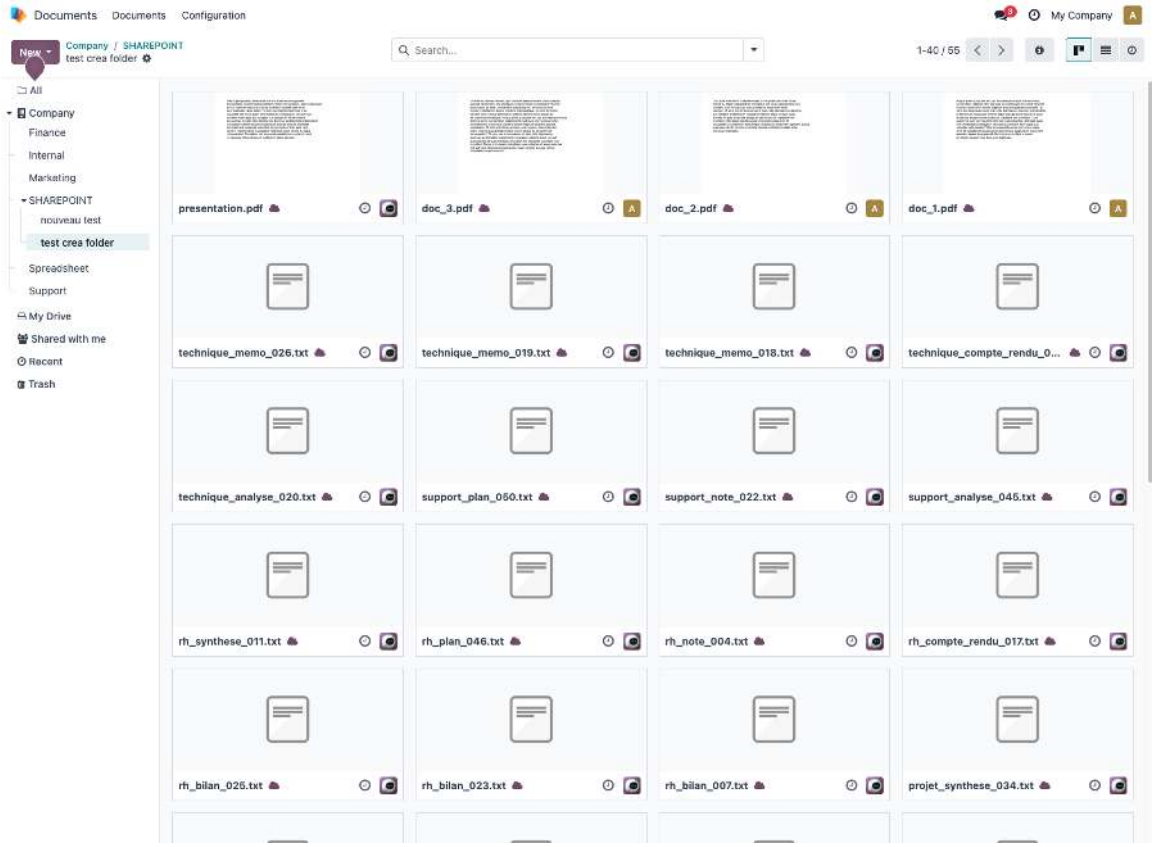

Figure 5: Odoo Documents - Cloud Documents

4.2 Open a Document in the Cloud

To edit an Office document directly in your browser:

1. Click on the document to select it
2. Click on the cloud icon or the "Open in cloud" button
3. The document opens in Office Online (SharePoint) or Google Docs

Astuce

Changes made in Office Online are automatically saved in SharePoint.

4.3 Add a New Document

When you add a document to a synchronized folder:

1. Drag and drop the file into the Odoo folder

2. The file is automatically queued
3. After a few seconds, it is sent to the cloud
4. The cloud icon appears on the document

4.4 Create a Subfolder

Subfolders created in Odoo are automatically created in the cloud:

1. In the synchronized folder, click "New folder"
2. Give the folder a name
3. The folder is created in Odoo AND in SharePoint/Google Drive

5 Maintenance and Monitoring

5.1 View the Sync Queue

The sync queue allows you to track ongoing transfers and detect errors.

1. Go to **Documents** → **Configuration** → **Cloud Storage** → **Sync Queue**
2. The list displays all operations:
   - **Pending**: Waiting to be processed
   - **Processing**: In progress
   - **Done**: Completed successfully
   - **Failed**: Failed (see error message)

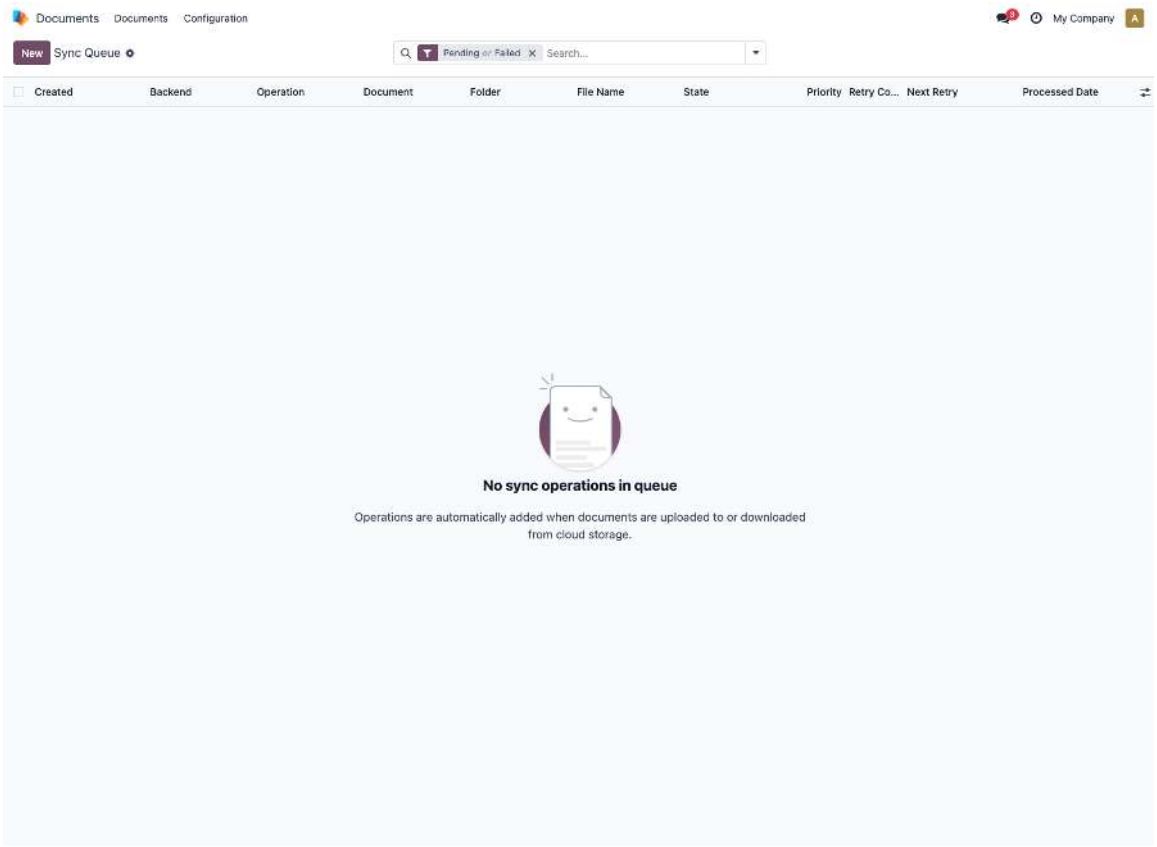

Figure 6: Odoo - Sync Queue

5.2 Handle Sync Errors

In case of synchronization failure:

1. Open the failed item in the queue
2. Check the error message
3. Fix the problem (permissions, deleted file, etc.)

4. Click **Retry** to relaunch

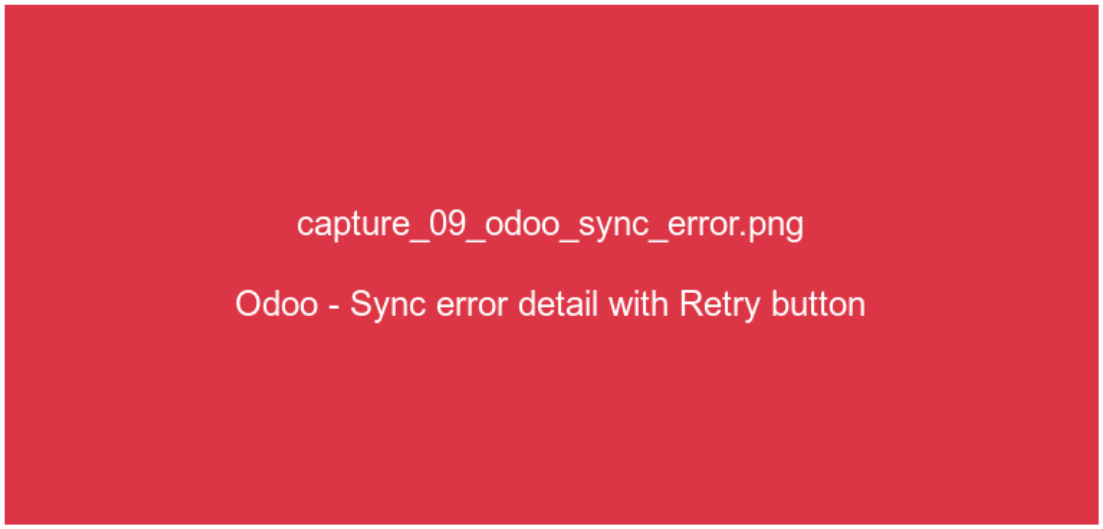

Figure 7: Odoo - Error Management

5.3 Force a Full Synchronization

If you suspect missing files:

1. Go to the cloud backend (**Configuration** → **Cloud Storage** → **Backends**)
2. Click **Reset Sync** then **Sync Now**
3. All files from the cloud are reimported

Attention !

A full synchronization can take time if you have many files.

5.4 Check Backend Status

1. Open the backend in **Configuration** → **Cloud Storage** → **Backends**
2. Verify that the status is **connected**
3. If disconnected, click **Connect** to restore the connection

Note

For SharePoint, the client secret expires after the configured duration (24 months by default). Remember to renew it before expiration.

6 Troubleshooting

6.1 SharePoint Connection Fails

Symptom	Solution
"Failed to acquire access token"	Verify that admin consent has been granted in Azure
"Site not found"	Check the SharePoint site URL (must be complete with /sites/...)
"Access denied"	Check API permissions (Sites.ReadWrite.All, Files.ReadWrite.All)
"Client secret expired"	Create a new secret in Azure and update Odoo

6.2 Google Drive Connection Fails

Symptom	Solution
"Redirect URI mismatch"	Verify the redirect URI in Google Cloud Console
"API not enabled"	Enable the Google Drive API in the console
"Invalid credentials"	Regenerate OAuth credentials

6.3 Files Are Not Syncing

1. Verify that synchronization is enabled on the folder
2. Check the sync direction (Bidirectional, Cloud to Odoo, etc.)
3. Check the sync queue for errors
4. Verify that the sync cron is active (Technical Settings $\rightarrow$ Scheduled Actions)

6.4 A File Does Not Appear in Odoo

- Wait a few minutes (synchronization is asynchronous)
- Launch a manual sync (Sync Now button)
- Verify that the file is in the synchronized SharePoint/Drive folder

Appendix: Screenshot List

N	File	Description
01	capture_01_odoo_sp_menu.png	Odoo - Menu Configuration > Cloud Storage > Backends > SharePoint
